

# Diamond | orbital-resolved singularity subtraction

Restricted Hartree-Fock · GTH-SZV / GTH-PBE ·  $2 \times 2 \times 2$  source mesh · FFTDF ( $37^3$ )

## SS and spherical cutoff

## Bare, SS, and spherical cutoff

Green: self-consistent FFTDF +  $v_{\text{cut, sph}}$ . All curves use the SS valence maximum as zero. Bare poles extend below the displayed range.
